About me

Hi, I'm Laura Gilvin, a creative artist in love with color and it's emotional effect on life and design. My style comes from a mix of clean modern design along with vintage elements and unique color stories.

When I was just 7 years old, I stood beside my mom and watched her make a lot of my clothes. I asked her to teach me and so I have been sewing, quilting and crafting with fabric ever since.

I am currently creating my own surface pattern designs which is something I have always wanted to do. The most exciting part is to create fabric and quilt designs simultaneously so there is balance in scale & color throughout a collection.

Enjoy my portfolio and I hope you'll be inspired to create beautiful projects!

Hearts

Grow & Bloom

{Colorway 1}

44 1/2" x 46 1/2"

Bloms & Butterflies

Clouds

Grow & Bloom

Life changes can allow us to meander down a different path.

A slower pace changed my own perspective and gave me time to pursue other interests. Now they are blooming into a beautiful garden!

Blooming Baskets Quilt

60" x 60"

Years spent quilting and shopping for fabric is what drives my passion to create! The ability to design a collection in my favorite colors, then create a quilt or other sewing project to display them is magical. I can't imagine ever running out of unique design and color combinations!

Barn Dance

This collection was inspired by our granddaughter and her love of cowgirl accessories. This tall, auburn haired beauty, looked the part in her cute boots and hat. Later at a boutique when I spotted a scented jar candle called Barn Dance, the collection began to form in my mind!

Leaves

Flowy Gauze

Inspiration

... can come in stages

One day I found a pretty little black & white moth on the grate of our house.

I made a drawing and saved it for the future.

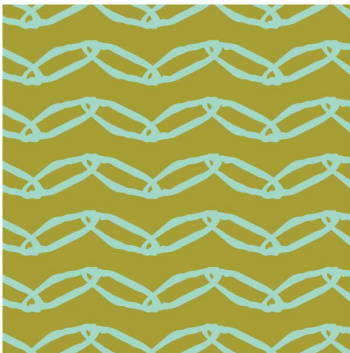

Time passed and as I was working on a new color palette, I remembered the moth drawing. It came out of hiding and went through a total color & design metamorphosis!

And then I had an idea a challenge! Could I create an entire collection using only the moth's spots?
